

Stone Sealer is a water-based sealing detergent for exterior pavers.

Coverage: Depends on how absorbent surfaces are, and whether pavers are old or new. 2½ litres will be sufficient for approx. 100 m².

Stone Sealer ensures that the exterior pavers achieve a repellent invisible "film" that rejects dirt and algae. Hereby the exterior pavers are easier to clean and ensure longer durability.

Always test on a small area to make sure the surface tolerates the cleaning detergent.

Packaging may be recycled in accordance with local regulations.

Readily biodegradable surfactants in accordance with EU legislation. Store in frost-free place.

Dosage:

- For use with HPW: 2-5%
- Dosage in concentrate sprayer 2½ litres to 2½ litres water.

Application:

- High-pressure washer
- Foam sprayer (item no. 128500077)
- Super Foam Sprayer (item no. 128500938)

Fill detergent into the cleaning tank/Foam Sprayer. Apply sealer on subjects to be sealed. Can also be used with a concentrate sprayer. Do not rinse the exterior pavers with clean water afterwards. The product will be dry after about 2 hours and completely hard after 1 week. Best used several times a year.
